

NA6 – Classic Red Limited edition (May 93)

1989 - 2019

This was the final special edition for NA6 cars in Australia and soon after the model transitioned into the NA8, (see below)

Mazda raided the parts bin of the Eunos (a Japan only, upmarket model of the MX-5 which had many luxury items available to order) to configure this NA run out model.

These cars are mechanically identical to the NA6 but have several trim and detail variations:

- All in red
- Tan interior
- Tan roof
- BBS wheels
- Power steering
- Colour co-ordinated detachable hard top with electric demister
- AM/FM radio with digital clock
- CD player
- Headrest speakers
- Power antenna
- Optional air-conditioning
- Remote release boot lid (note this was NOT available on earlier cars or LE's)
- They also had the first of the chassis stiffening braces that firmed up the suspension/chassis. In this case, the Classic Red cars had the bolt on member between the rear, lower wishbone pivots on the rear suspension
